

## FOUNDATION OF YOUR BUSINESS ONLINE

### BUSINESS SUPPORT/HOSTING

Website hosting and business support is one of the most competitive markets in the Internet today. When faced with so many options it may be tempting to make a decision based solely on price, but the consequences of choosing the wrong host for your website can be extremely costly. You would not think of opening a store without first researching the location; the same care must be applied when selecting a home on the Web for your business.

Not all Web hosts are created equally. While any will get your website online, there are vast differences in the technology used to do so. Equipment reliability (failures make your website inaccessible to customers) and security are real considerations, and bargain basement hosts often lack the stability to serve businesses effectively.

Fortunately, WSI Internet Consultants can offer a variety of affordable, feature-packed hosting plans with security and reliability built-in. It's the advantage of Business-Grade web hosting with our Data Center Partners.

**For more information on a secure and reliable hosting and support plan for your business' website, contact your WSI Internet Consultant today!**

## ADVANTAGES OF BUSINESS-GRADE WEBSITE HOSTING

### SECURITY

Our carefully screened and qualified Data Center Partners operate secure facilities with limited access to authorized personnel only. All web servers are protected by firewalls with advanced intrusion detection features to guard against hacker threats that could potentially compromise your website's integrity, and use industry-leading 128-bit SSL encryption to keep sensitive data private and secure.

### RELIABILITY

Systems are monitored 24x7 by highly trained and certified support staff. Included daily data backups with off-site storage means unbeatable recovery and restore capability for your valuable website data. While many Web hosts charge a fee for this service, it's included with your hosting package at no additional charge.

### VALUE

Unlike other hosting providers, there are no hidden limits on your disk space or bandwidth usage; your Internet Consultant will recommend the best plan for your business and explain what you're getting. With state-of-the-art hardware/software and a long list of features, you can't find more value in a Web host for your business.

### TECHNICAL SPECIFICATIONS

- Microsoft & Linux Server Architectures
- Secure-Access Hosting Environment
- 24x7 Systems Monitoring
- 99.9 to 100% Service Availability
- Intrusion Detection
- Traffic Filtering
- Virus and Spam Protection
- Daily Off-Site Data Backups
- Multiple T3 Data Connections
- 128-bit SSL Data Encryption
- RAID-5 Disk Drive Technology
- MS SQL, MySQL, and MS Access database
- ASP, PHP, and .NET Scripting
- ...plus much more

**ALL THIS WITH NO HIDDEN  
LIMITATIONS OR FEES.**

### SITEMAIL TECHNOLOGY

Included with your Business-Grade Website Hosting/Support package is the SiteMail email management solution. SiteMail gives you complete control over your email services and allows you to monitor your domain and employee emails to:

- Ensure the proper routing of emails based on keywords within the content
- Monitor competitive activities or potential corporate espionage within the company
- Maintain and expand customer service levels
- Minimize productivity loss through inappropriate email use

Also included with your SiteMail system are the following value-added features:

### WEB MESSAGING

Users can send and receive emails from any Web browser while enjoying their favorite desktop email features like spell-check, address book and file attachments.

### SECURITY

Support for SSL (Secure Sockets Layer) encryption in Web Messaging protects passwords and content from unauthorized access.

### COMPATIBILITY

Users can also retrieve email through common client email software such as MS Outlook, Outlook Express, Eudora and more.
